# PUSHPENDRA PATEL

Senior Software Developer | .NET Full-Stack Developer

patelpushpendra.git@gmail.com | +91 9998672503 | Gandhinagar, Gujarat, India | patelpushpendra.gitce@yahoo.com

## PROFESSIONAL SUMMARY

Senior .NET Developer with 12+ years of professional experience designing, developing, and maintaining web applications, REST APIs, POS, restaurant ordering, reservation, inventory, and payment systems. Strong expertise in C#, ASP.NET Core, ASP.NET MVC, Web API, SQL Server, Dapper, Entity Framework, JavaScript, Mordan front end technology and Azure. Experienced in database optimization, API integrations, cloud deployment, CI/CD, authentication, production troubleshooting and end-to-end development. Proven experience working with distributed teams and business stakeholders across international projects in the USA, Canada, Australia, and UK.

## CORE COMPETENCIES

- .NET Full-Stack Application Development
- SQL Server Database Design & Optimization
- Azure Cloud Application Development & Serverless Solutions
- Authentication, Authorization & Secure API Development
- CI/CD, Azure DevOps & Git-Based Development
- Technical Leadership, Code Reviews & Agile/Scrum
- Quick Adoption of New Technologies
- C# / VB / ASP.NET Core / ASP.NET MVC / Web Forms
- RESTful API Development & Payment/Third-Party Integration
- React & Angular Frontend Development
- Clean Architecture, SOLID Principles & Design Patterns
- Performance Optimization & Scalable Application Design

## TECHNICAL SKILLS

| | |
|---|---|
| **Languages** | C#, VB, SQL, JavaScript, TypeScript |
| **Web Technologies** | HTML5, CSS3, Razor, JSON, AJAX |
| **Frameworks** | .NET, .NET Core, ASP.NET Core, MVC, Web Forms, Web API, Entity Framework, ADO.Net, Dapper, LINQ |
| **Frontend** | HTML5, CSS3, Razor, Bootstrap, jQuery, AJAX, React.js, Angular, Kendo UI, Telerik |
| **Databases** | Microsoft SQL Server 2008–2022, MySQL, Firebase Realtime Database, Indexed DB |
| **Cloud & DevOps** | Microsoft Azure (Functions, App Services, Storage, DevOps, CI/CD Pipelines), Git, GitHub |
| **APIs & Integration** | RESTful APIs, SOAP, GraphQL, Stripe, PayPal, Twilio, SendGrid, UberEATS & DoorDash API. |
| **Web Security** | JWT Authentication, OAuth, Role-based Authorization |
| **Architecture & Development** | MVC, Clean Architecture, Repository Pattern, CQRS, SOLID Principles, Design Patterns, Microservices |
| **Tools & Methods** | Visual Studio, VS Code, SQL Server Management Studio, Postman, Swagger, Git, Asana, Agile, Scrum |

## PROFESSIONAL EXPERIENCE

**Senior Software Developer** *[FoodCore] | Canada* 07/Oct/2024 –31/Aug/2026

Restaurant Management & Online Food Ordering Platform

*Technology Stack: C#, ASP.NET Core, Web API, Dapper, SQL Server, Azure, HTML5/CSS3, JavaScript, Bootstrap, Razor Views, React.js.*

- Delivered complete end-to-end application features spanning responsive UI, Razor/Admin screens, React Manager WebApp functionality, REST APIs, business logic, Dapper-based data access, SQL Server changes, and deployment.
- Built modules for Menu Management, Location Settings, Order Management, Kitchen Display System, POS, Delivery Management, Customer Loyalty, and Online Ordering. Develop WebApp for manage menu, order and configuration by Manager.
- Developed REST APIs consumed by web and mobile applications, Improved application performance using caching, optimized SQL queries, and asynchronous processing. Integrated payment gateways, SMS, email notifications, and third-party delivery platforms. Mentored developers, performed code reviews, and participated in Agile/Scrum ceremonies.

**Senior Software Developer** *[Dine Palace/FudMe] | Canada* 2021 – 2024

Restaurant Food-Ordering Management

*Technology Stack: C#, ASP.NET Core, Dapper, SQL Server, REST APIs, JavaScript, jQuery, Bootstrap, Razor Views, AJAX*

- Delivered complete features across responsive UI backend business logic, Dapper data access and database operations.
- Built features for online menu management, order processing, coupon management, customer accounts, and reservations.
- Developed and optimized SQL Server stored procedures and database operations to improve application performance.
- Investigated and resolved production issues while delivering new features based on customer and business requirements.
- Collaborated with QA and business teams to plan, test, and deliver application releases.

**Senior Software Developer** *[Nexuslink] | USA* 2014 – 2021

Neptune - Point of Sale & Recreation Management System

*Technology Stack: C#, ASP.NET MVC, SQL Server, JavaScript, RESTful APIs, HTML/CSS, Bootstrap, jQuery*

- Developed and maintained a comprehensive Point-of-Sale (POS) and reservation management system for parks and recreation facilities across 20+ locations.
- Designed and implemented full-stack web application for support ticketing, memberships, facility bookings, inventory tracking, and customer management.
- Designed and built advanced scheduling and reservation workflows, managing 50,000+ annual reservations with automated conflict resolution. Collaborated with clients and business stakeholders to gather requirements, analyse workflows, and translate requirements into technical solutions.
- Supported production applications, investigated defects and implemented application enhancements.

Saturn - Public Reservation Platform: *Technology Stack: C#, ASP.NET MVC, SQL Server, JavaScript, REST APIs, HTML/CSS, Bootstrap*

- Developed customer-facing reservation functionality for Hearst Castle and California State Parks.
- Built reservation, ticketing, search, inventory, and reporting. Integrated Map box API to provide location-based search and reservation functionality. Developed reporting and inventory workflows for physical tickets and wristband tracking.
- Supported application maintenance, troubleshooting, and enhancement of high-volume reservation workflows.

**Software Developer** *[Nexuslink] | Australia*

CIQ - Corporate Registration & Compliance Platform

*Technology Stack: C#, ASP.NET MVC, SQL Server, REST APIs, HTML/CSS, JavaScript*

- Developed and enhanced corporate registration and compliance management solutions for a business services platform with expertise rooted in registering companies since before the establishment of ASIC.
- Contributed to scalable systems supporting the registration and management of 50,000+ companies, streamlining business incorporation and compliance workflows for clients across Australia. Built secure and efficient web-based applications to automate company registration, document management, and compliance tracking processes.
- Optimized backend workflows and data processing operations, improving application performance, reducing manual processing time, and enhancing operational efficiency for high-volume registrations.

Additional Notable Projects

**Fuel Management System** - Built fleet management and fuel tracking system for logistics company with 200+ vehicles [Nexuslink]

**Monza Car Hire** (UK) - Developed vehicle rental platform with dynamic pricing engine and management. [The Tech Guys/ Multi InfoTech]

**E-Commerce** -Full-featured online shopping with payment gateway integration and order management. [The Tech Guys/ Multi InfoTech]

**Scholer -** Project Related School Management System [Hi-tech InfoSoft]

## EDUCATION

**Bachelor of Engineering in Computer Engineering** - *Gandhinagar Institute of Technology, Gujarat University*

## LANGUAGES

**English:** Professional Working Proficiency **Hindi:** Bilingual Proficiency **Gujarati:** Native
